

Multi Dosing and Inline Mixing System SD-KVS

- Flexible dosing and inline mixing system for products of different viscosities and variable dosing percentages
- System can be equipped for maximum 4 base materials and up to 12 components (catalysts, pigments) → modular upgrade possible
- Self cleaning through SCHWERDTEL proven static mixer technology → minimized waste during product change-over
- Filling into cartridges or sausages or drums
- Optional with flow meters at injection points for highest dosing accuracies
- State-of-the-art touch panel control for comfortable operation and recipe storage
